Object: letter of support to the response of the consortium coordinated by Télécom Bretagne, l'Institut Mines Télécom (response to the call for network from generic ANR 2013)

Dear Colleague,

I am glad to confirm by this letter the support of my research team on seamless learning in the National Institute of Education, Singapore, to the network project ORPHEE, coordinated by Télécom Bretagne, Institut Mines Télécom, on behalf of a consortium associating French research teams on e-education, bringing together various disciplines such as educational technology, education, pedagogy, and computer-science.

This network is a great opportunity for us to contribute to consolidating the Technology Enhanced Learning research community in Europe and at an international level, and to develop future collaborative research with the French research team in this area.

Sincerely,

A handwritten signature in black ink, appearing to read 'Chee-Kit Looi', written in a cursive style.
